

DANCE FLOOR

Our Oak Parquet Dance Floor can be used inside and outside. For outside applications, the floor must be covered when not in use and does require a Port-A-Floor sub-floor. Each dance floor section is 3' x 3'. We can install a dance floor in any increment of three foot (3') - see chart below.

Pick a size & find the number of sections needed, where the two numbers meet:

(A 21' x 24' dance floor would have 56 sections; cost would be \$616.00 without sub-floor.)
